

Industrial Water Requirements

Factors governing industrial water requirement:

1. Type of industry
2. Size of industry
3. Number of industries

Water Consumption for Different Kinds of Manufacturing Industrial Units

40 Kilolitres Water
Per Vehicle Manufactured

122-170 Kilolitres Water
Per Kilolitre Alcohol

**80-200 Kilolitres Water
Per Ton Fertilizer**

**200-400 Kilolitres Water
Per Ton Paper**

**200-500 Kilolitres Water
Per Ton Steel**

**8-14 Kilolitres Water
Per 100 Kg Textile**
