## INTRODUCTION

The water resources sector is inherently multidisciplinary. Ensuring its sustainable development requires a skilled workforce equipped with appropriate competencies. These skills are cultivated through continual investment in training and capacity building of professionals working in the water sector. Both Central and State Governments play crucial roles in this effort through various training institutes staffed by engineering professionals specializing in their respective domains.

Given the applied nature of in-service training, the role of these professionals as trainers becomes vital. The need for structured development of such trainers has been recognized across several forums. Notably, during the Workshop on Training Need Assessment for Water Resources Development and Management (WRDM), a significant recommendation was made for "Trainer/Faculty Development" to enhance the capacity of trainers for effective knowledge dissemination. In response, the National Water Academy (NWA) conceptualized and launched the *Faculty Development Program (FDP)* in 2023, aimed at strengthening the capabilities of trainers in the water sector. Since, 2023, NWA is regularly conducting the FDP Program.

In a rapidly evolving world, trainers must stay abreast of modern pedagogical methods and tools. This program addresses these challenges by equipping trainers with essential knowledge, techniques, and resources to improve their instructional effectiveness and foster professional growth. The FDP also explores critical questions such as: Who is best suited to be a trainer? What responsibilities do they bear? How can training be effectively designed and delivered?

The program emphasizes confidence-building, audience engagement, and impactful communication—enabling trainers and organizations to build internal capacities for achieving institutional objectives.

## PROGRAM OBJECTIVE

This FDP aims to equip trainers and professionals with the skills and competencies required to effectively plan, deliver, and evaluate training programs. Covering the complete training cycle—from understanding participant needs and program design to delivery and impact assessment—the program fosters confidence and clarity in training management.

## PROGRAM CONTENT

The program covers the following areas:

- Concept of "Trainer Development" and Training of Trainers (ToT)
- Understanding "Entry Behaviour" and its relevance
- Training vs. Education, Learning & Development
- Adult Learning Principles: Pedagogy and Andragogy
- Systematic Approach to Training (SAT)
- Training Needs Assessment (TNA) and its importance
- Training Methods and Direct Trainer Skills (DTS)
- Designing Learning Units (OELA) and Training Programs
- Coaching as a Tool for Skill Development
- Experiential Learning and Effective Communication
- Presentation Skills for Knowledge Transfer
- Training Management and Time Management
- Professional Ethics
- Training Evaluation
- Group Activities, Role Play, and Action Plan Presentation
- Training Methodologies and Approaches

## METHODOLOGY

The five-day program uses research-based teaching methods and includes concept sharing, faculty presentations, participant discussions to show what they have learned, and activities and games to reinforce the concepts. The program's whole structure is based on clearly defined subjects, ensuring that participants understand the numerous training modules.
